# Anish Safui

Industry Consultant · Senior Developer
isafuianish-dev.github.io

## Profile Summary

Senior Developer & Industry Consultant with 13+ years of experience delivering enterprise solutions for leading insurance and retirement clients, including Prudential Financial, MassMutual, Hartford, and Empower. Expertise in UNIX/AIX, IBM DB2, application modernization, system architecture, and large-scale platform migrations from on-prem to AWS. Led the migration of Prudential's VISION OmniPlus platform from IBM Mainframe to AIX UNIX and currently architect solutions for Disability Claim Management Systems, including CQRS-based scaling, monolith decomposition, and API-driven communication frameworks. Proven track record in cloud and AI adoption, automation using Python and Shell scripting, and developer productivity initiatives. Certified in AWS, IBM Generative & Agentic AI, and Python (PCAP).

## Technical Skills

| | |
|---|---|
| Languages & Scripting | Python, COBOL, JavaScript, HTML, CSS, KSH Shell Script, AWK, Perl, Batch Script, MS VBA / Excel VBA, SQL PL, Omni Script |
| Databases | IBM DB2 (CLI & Stored Procedures), VSAM, DB2 SQL PL Stored Procedures |
| Version Control & CI/CD | Git, GitHub, Bitbucket, GitHub Workflows, Jenkins CI/CD, Redgate Pipeline, PVCS |
| DevOps & Security | HashiCorp Vault, Ansible, AWS Lambda, AWS Glue, Autosys, JobTrac, Crontab, Cyberfusion |
| Mainframe Ecosystem | JCL, TSO/ISPF, Changeman, FileAId, Microfocus Express Edition |
| Enterprise Systems | FIS OmniPlus, DCMS (Disability Claim Mgmt System) |
| API & Testing | Postman, cURL, REST APIs |
| Monitoring & Observability | Splunk, Dynatrace, Galileo |
| Project Mgmt & Agile | Jira, ServiceNow, Miro, Amplify |
| AI & Productivity Tools | Claude (Anthropic), GitHub Copilot |
| Architecture & Patterns | CQRS, Read Replica Design, Microservices, Mainframe-to-UNIX Migration |
| Cloud | AWS (Certified Developer & AI Practitioner) |

## Professional Experience

**Prudential Financial** | IBM US Corporation (+ IBM India Pvt Ltd) — Jul 2024 – Present
**Disability Claim Management System (DCMS)** — Senior Developer / Tech Lead

- Architected and implemented DCMS **Read Replica using Command Query Responsibility Segregation (CQRS) pattern**, significantly improving read performance and enabling independent scaling of query workloads.
- Led a **modularization** initiative to transform the monolithic DCMS architecture into **AWS service-based components**, improving scalability, maintainability, and fault isolation.

- Designed and delivered a next-generation communications solution for DCMS using **Kong-secured REST APIs** for SMS and email delivery, transforming legacy batch communications into a scalable, API-driven architecture with enhanced security, observability, and operational efficiency.
- Designed and developed **complex DB2 stored procedures** (SQL PL) and **UNIX** process frameworks that orchestrate multiple backend technologies, including KornShell (KSH), Python, AWK, and Perl, with a VB.NET front end.
- Drove **CI/CD adoption using Jenkins, Bitbucket, and GitHub Actions**; introduced HashiCorp Vault for secrets management and **Ansible** for infrastructure automation.
- Drove significant **operational automation** initiatives using Python, Shell Scripting (KSH), Excel VBA, and batch scripting, reducing manual effort, improving monitoring and reporting accuracy, and increasing overall team productivity.
- Served as the **primary liaison between business stakeholders and development teams**, leading code walkthroughs, design reviews, and the translation of business requirements into technical specifications.
- Created and published technical innovations, best practices, and productivity accelerators on **IBM Lighthouse**, IBM's enterprise-wide knowledge-sharing platform, promoting adoption across the organization.
- Developed **reusable automation frameworks** and support utilities to streamline production support, incident resolution, deployment activities, and routine operational tasks.
- **Mentored team** members and facilitated **knowledge-sharing** sessions, contributing to improved onboarding, technical excellence, and long-term platform sustainability.

**Prudential Financial** | IBM US Corporation (+ IBM India Pvt Ltd) Jun 2018 – Jun 2024
**Retirement – VISION OMNI (FIS OmniPlus Record Keeping System)** Industry Consultant / SME

- Led the end-to-end migration of Prudential Financial's mission-critical **VISION OmniPlus retirement recordkeeping platform** from a legacy **IBM Mainframe environment (JCL, COBOL, VSAM)** to **AIX UNIX (KornShell, IBM DB2, Python)**, ensuring business continuity, data integrity, and regulatory compliance throughout the transition.
- Served as a key technical lead across multiple workstreams, designing and developing client-facing and peripheral applications that enhanced operational efficiency, integrated with core retirement processing systems, and supported evolving business requirements.
- Architected, developed, and supported complex batch-processing ecosystems spanning **20+ upstream and downstream applications**, managing daily, weekly, monthly, quarterly, and annual processing cycles while ensuring high availability and strict SLA compliance.
- Drove significant operational automation initiatives using **Python, Shell Scripting (KSH), Excel VBA, and batch scripting**, reducing manual effort, improving monitoring and reporting accuracy, and increasing overall team productivity.
- Represented the application team during internal and external audits, ensuring adherence to governance, security, compliance, and operational controls while addressing stakeholder reporting and documentation requirements.

- Provided production support and root-cause analysis for critical business processes, proactively identifying system improvements and implementing solutions to enhance stability, performance, and maintainability.

**MassMutual Financial** | Cognizant Technology Solutions — Jan 2015 – Jun 2018
**Retirement – Omni/Output Support & Maintenance** — Senior Developer / Team Lead
+
**Hartford Financial** | Cognizant Technology Solutions — Mar 2013 – Dec 2014
**Retirement – Omni/Output Support** — Developer / Trainee

(i) MassMutual Financial acquired the Retirement business from Hartford Financial – I continued to work on the same project for both clients.

- Led UNIX and Mainframe production support operations, managing job abends, batch processing failures, incident triage, root-cause analysis, and permanent corrective actions across L1 and L2 support queues to maintain system stability and meet business-critical processing deadlines.
- Monitored and supported complex enterprise batch environments, proactively identifying performance bottlenecks, resolving system issues, and collaborating with infrastructure, database, and application teams to minimize production downtime.
- Managed the full incident and problem management lifecycle through **ServiceNow**, ensuring timely resolution of production issues, adherence to SLA commitments, accurate documentation, and effective stakeholder communication.
- Coordinated change management, release planning, and production deployments, performing impact assessments, validating implementation plans, and ensuring smooth transitions with minimal business disruption.
- Prepared and presented weekly and monthly operational dashboards, service metrics, and executive status reports, providing clients and leadership with visibility into system health, incident trends, project progress, and risk areas.

## Certifications

**AWS Certified AI Practitioner (Early Adopter)**
Amazon Web Services

**AWS Certified Developer – Associate**
Amazon Web Services

**IBM Generative & Agentic AI Foundation**
IBM India Pvt Ltd

**[PCAP-31-03] PCAP™ – Certified Associate Python Programmer**
Python Institute

**DB2 10.1 Fundamentals**
IBM India Pvt Ltd

**RPF Module 1: Lifecycle of A Plan**
American Society of Pension Professionals & Actuaries

## Education

**Bachelor of Technology**
Computer Science & Engineering
Year: 2012
Grade: 7.81 / 10
